GENERATING/TRANSFERRING CIRCUIT

## PRELIMINARY AMENDMENT UNDER 37 CFR 1.111

Commissioner for Patents Washington, D.C. 20231

Sir:

In response to the Final Office Action mailed November 5, 2002, kindly amend the above-referenced application as follows:

## IN THE CLAIMS:

Kindly amend the claims as follows:

1. (Twice Amended) A voltage generating/transferring circuit comprising:

a boost unit group including a plurality of boost units series-connected between input and output nodes;

a first transistor connected between the input node and a node for receiving a first voltage; and

a first capacitor having one end which is connected to the output node, and another end which receives a first oscillation signal,

wherein each boost unit has input and output portions, a second transistor having a gate and a drain connected to the input portion and a source connected to the output portion, and a second capacitor in each boost unit connected to the input portion, and a gate of said first transistor is connected to the input portion of one of the boost units.
